

Sea Alarm 2013 autumn newsletter

Sea Alarm Newsletter: Autumn 2013

Sea Alarm has been active in many oiled wildlife response exercises and training sessions recently. Growing staff and updated websites have increased our visibility and capability, and there have been positive developments for oiled wildlife response in the Baltic Region.

HELCOM agrees to develop wildlife response plans by 2016

Having just reported that HELCOM Response was recommending stronger oiled wildlife response targets, Sea Alarm is pleased to note that on 3 October, the 2013 Copenhagen Ministerial Meeting of HELCOM, the Baltic Marine Environment Protection

Exploring the need for NGO cooperation in the Baltic Sea Region

In anticipation of the decisions by the HELCOM Ministerial Meeting, Sea Alarm has asked Agni Kaldma from Estonia to work on a project to identify the possibility of creating more and closer regional cooperation between leading NGOs in the Baltic countries.. [Read more...](#)

Comprehensive oiled wildlife exercises the Netherlands

As part of a multi-year contract with Rijkswaterstaat, Sea Alarm designed, prepared and facilitated a two-day exercise event held in October 2013 in 's-Gravezande, the Netherlands, which included three field and two table-top exercises. [Read more..](#)

Commission, has agreed on those targets..

States of Guernsey make progress in oiled wildlife response preparedness

Sea Alarm has been asked to assist the States of Guernsey in reviewing and updating their arrangements for oiled wildlife preparedness and response. As part of the process, an oiled wildlife preparedness training event and stakeholder meeting was held in mid-September in conjunction with an Oil Spill Response (OSRL) shoreline cleanup training course.
