

# Oiled Wildlife Response Level 2

## Managing the Wildlife Branch

**Who is it for?**

Those who have a direct wildlife response role in the IMS, who may have to make decisions, manage wildlife operations or plan for them

**Delivery**

2-day course, face to face

**What will you learn?**

Setup and function of a Wildlife Branch

Ability to populate Common Operating Picture (COP) and Incident Action plan for Wildlife

Decision-making and deployment of wildlife response strategies

Wildlife-specific advice to response cells for onshore and at-sea response

How to communicate and solve wildlife management challenges in the IMS

Assessment tools and how to implement preparedness programmes

**Training methods**

**Theory presentations**

**WildX interactive tabletop exercises**

*"I am more prepared if we need to build a Wildlife Branch"*  
*"The course raised some important questions regarding lack of wildlife capability in our country"*

*"Learning while practicing is better than just taking notes"*  
*"This is a new and innovative way of training"*
